SUMMARY

Motivated computer science student with a strong foundation in frontend development. Proven ability to create functional clones of complex web applications like Amazon and Flipkart. Eager to apply skills and learn new technologies in a professional environment. Focus on detail and user experience.

SKILLS

- **Core Languages:** HTML, CSS, JavaScript(Basic)
- **Tools:** Sublime Text, VS Code, Notepad

PROJECTS

AMAZON CLONE

Tech Stack : HTML, CSS

- Developed a multi-page web application clone mimicking the functionality and UI of Amazon.
- **Key Features**:Product listing grid, functional search bar, dynamic shopping cart, user authentication flow, responsive product detail pages, and checkout process simulation.
- **Scale**: Over 50 unique product entries, full multi-page flow.
- **Impact**: Deepened understanding of complex DOM manipulation and cart logic.

FLIPKART CLONE

Tech Stack : HTML, CSS

- Built a similar large-scale E-commerce clone of Flipkart, focusing on its specific design patterns.
- **Key Features**: Carousel-based banner system, category filtering, detailed filtering by brand and price, and custom product card designs.
- **Scale**: Comparable to the Amazon clone, with different visual styling.
- **Impact**: Enhanced understanding of various layout techniques and user flows.

EDUCATION

Bachelor of Technology in Computer Science and Engineering Expected Graduation: September 2027

J.C. Bose University of Science and Technology, YMCA, Faridabad, Haryana
Coursework: Data Structures and Algorithms, Computer Networking, Operating Systems, DBMS

LANGUAGE

English , Hindi
